QUOTE FLOW

Fast as Fahhhhh
Orbyte Smart SME
Challenge · Domain 2

Xinjie • YieXian • Sweeway

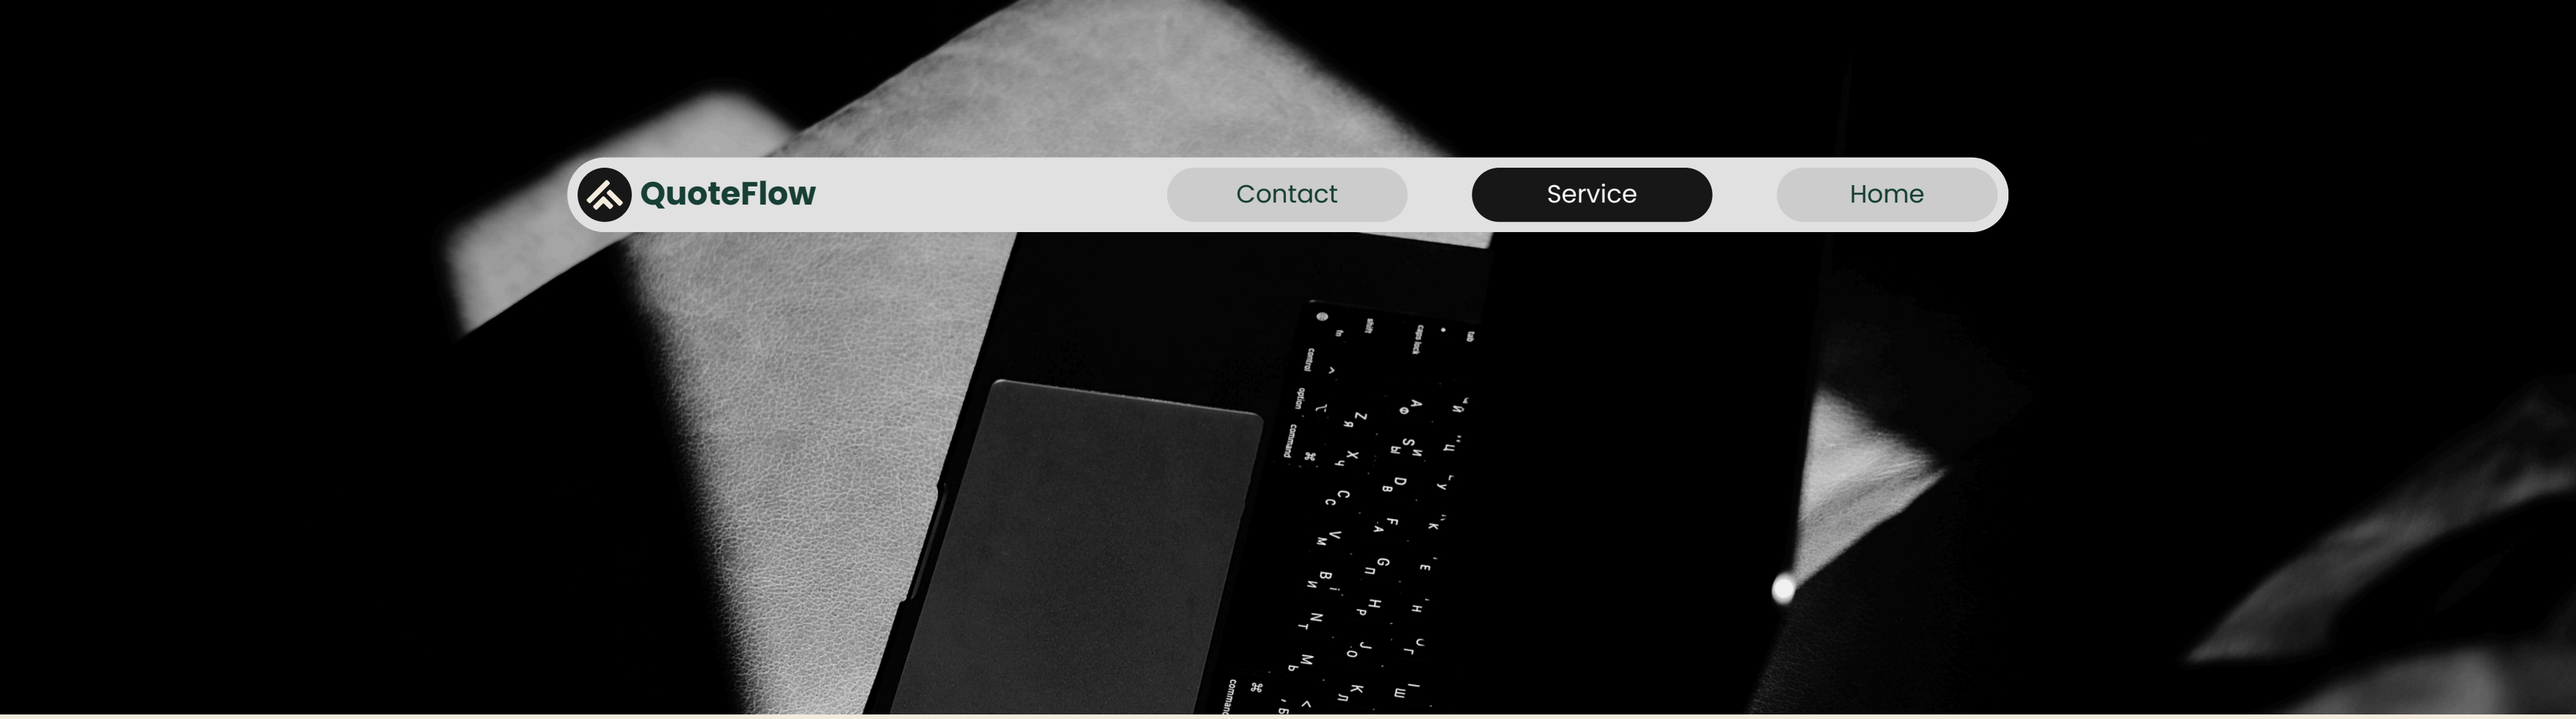

THE PROBLEM

Customer messages arrive in many places.
Staff copy details into quotations by hand.

Missing details mean more questions.
Repeated edits slow down customer replies.

OUR SOLUTION

AI turns Telegram messages into a quotation draft.

- Staff check details and fill gaps.
- Manager sets prices and approves.
- QuoteFlow prepares the PDF and summary.

WORKFLOW

1 Telegram receives the enquiry

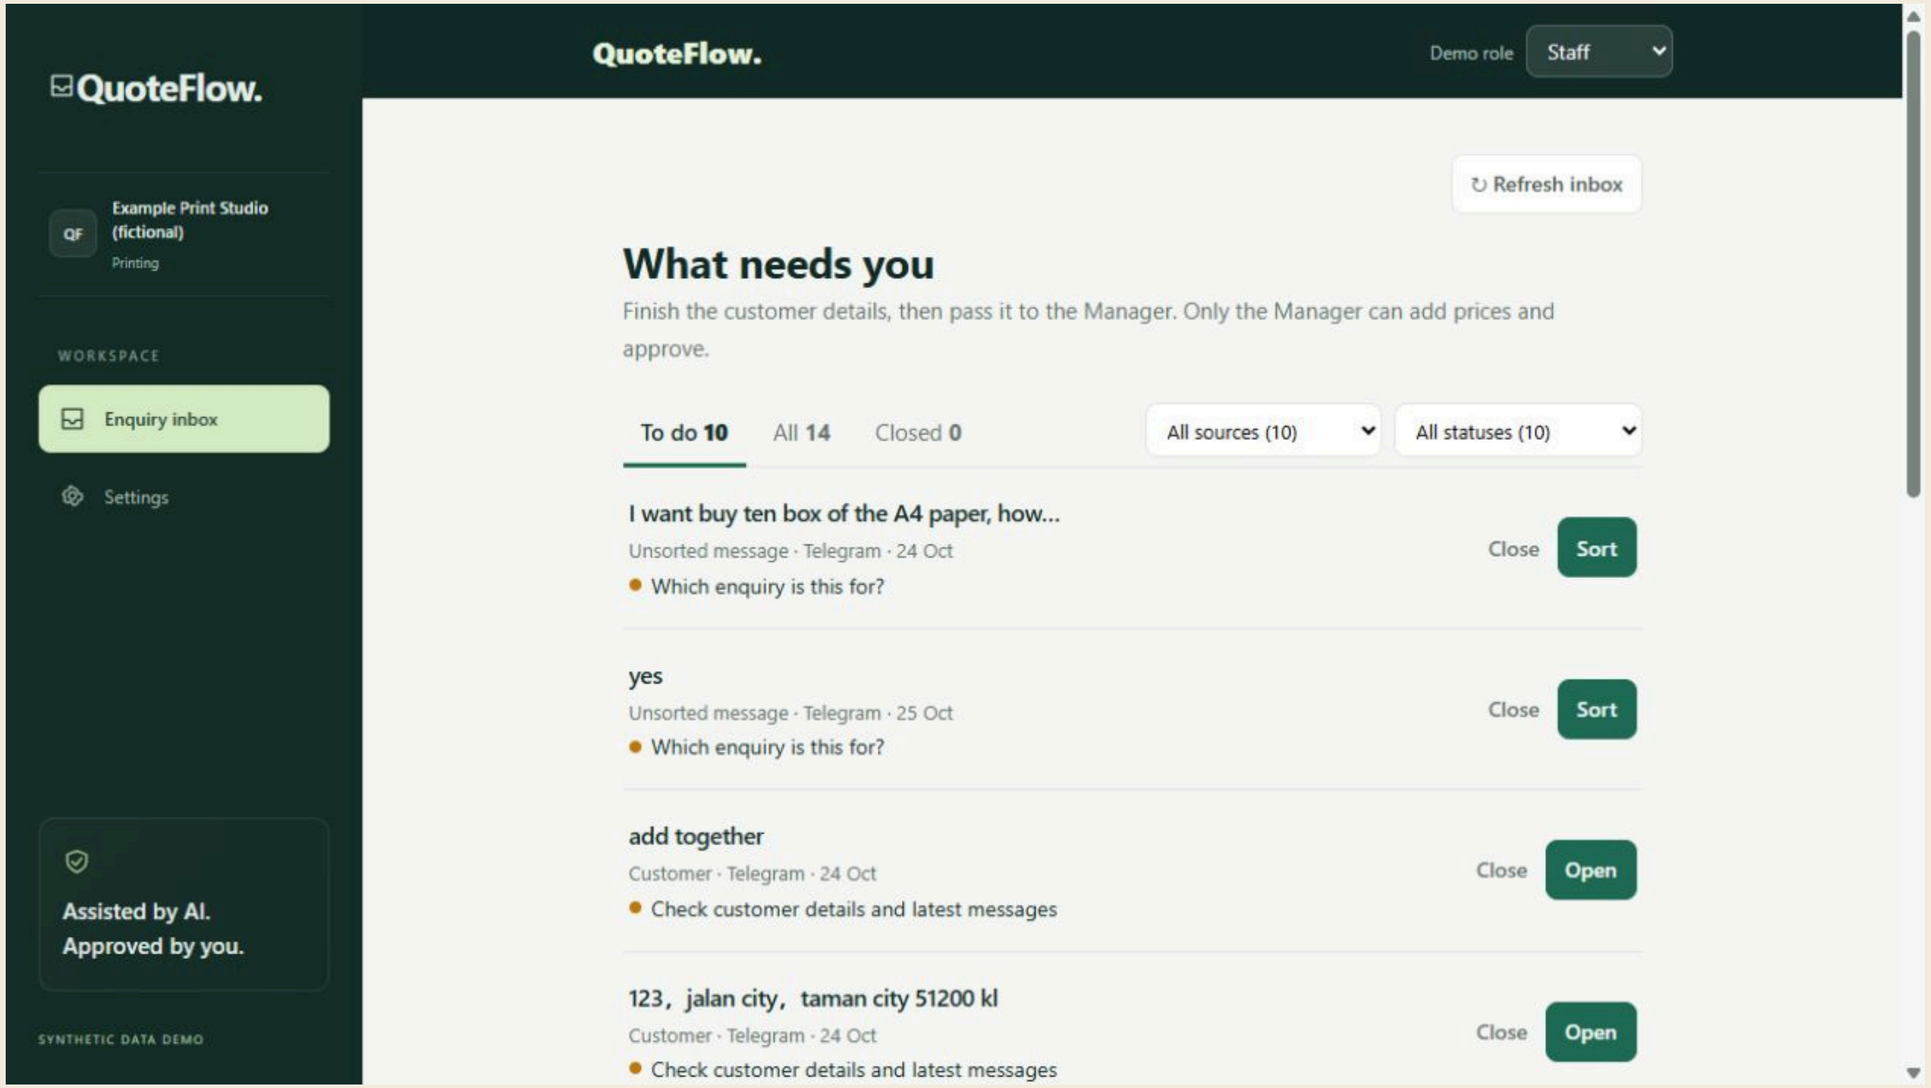

2 AI finds details and missing information

3 Staff checks and submits the draft

4 Manager sets prices and approves

5 PDF and summary go to Telegram

OUR TECHNOLOGY

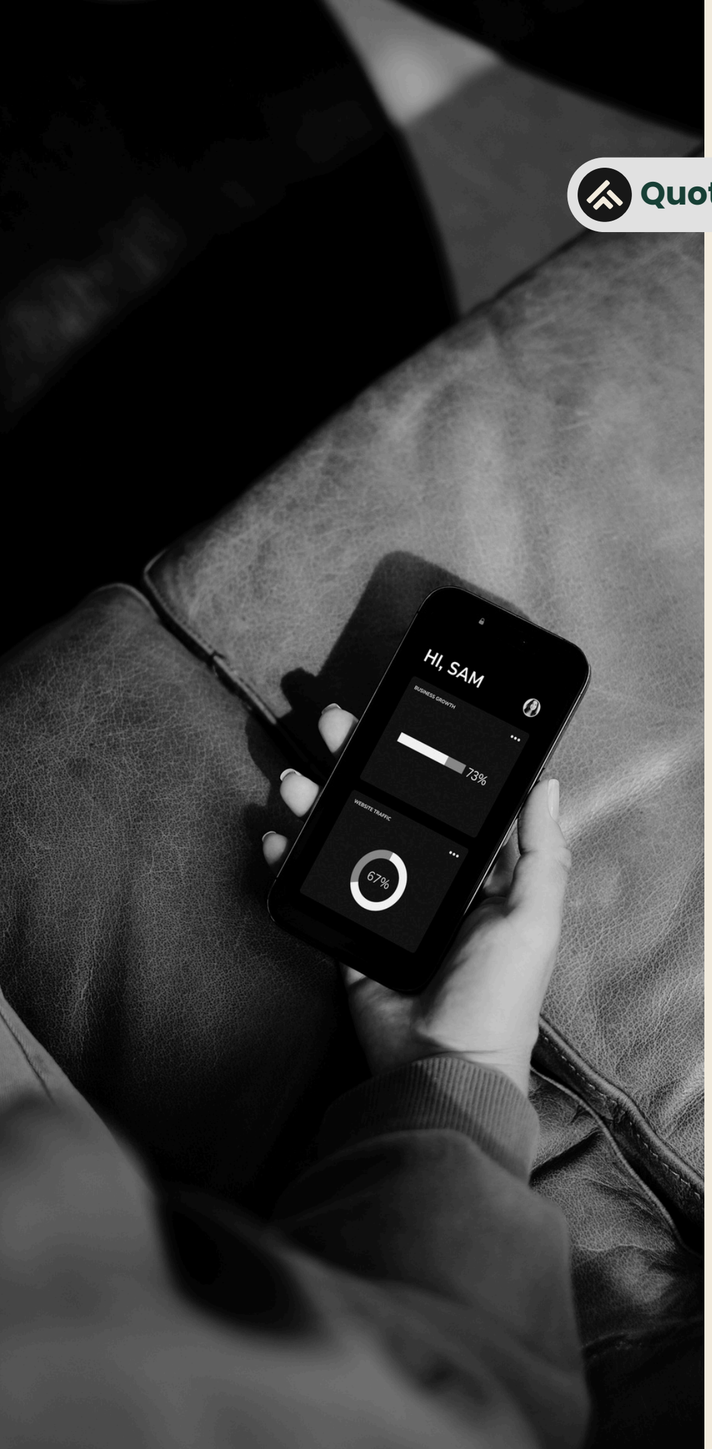

Runpod GLM-5.3 extracts details.
Replit hosts the web demo.

FastAPI + PostgreSQL

Python runs the business rules.
PostgreSQL stores messages and quotes.

Telegram + ReportLab

Telegram connects the customer.
ReportLab creates the saved PDF.

SME IMPACT

Our goal: less copying and fewer edits.
More time for customers.

SDG 8: Decent Work and Economic Growth
Helping small teams work better.
Impact still needs user testing.

WHAT'S NEXT

Verify full live Telegram delivery.
Test the latest hosted AI workflow.

Measure time saved with SMEs.
Future: WhatsApp, Instagram and Facebook.
